

Questions on Triggers

- 1 Create a trigger on Orders that logs every INSERT into an OrderAudit table.
- 2 Create a trigger on Orders that logs changes when an OrderDate or ShipDate is **updated**.
- 3 Create a trigger on Customers that prevents deletion of any customer who still has orders.
- 4 Create a trigger that automatically updates a CustomerSummary table whenever a new order is inserted.
- 5 Create a trigger on OrderDetails that prevents discounts above 50%.
- 6 Create a trigger that inserts a log entry when a product's category is changed in the Products table.
- 7 Create a trigger on Orders that **calculates total profit** after each new order insert and updates a SalesSummary table.
- 8 Create a trigger to prevent updating the Profit field directly in OrderDetails (to protect from manual edits).
- 9 Create a trigger on Customers that automatically converts CustomerName to proper case (INITCAP) before insert.
- 10 Create an **AFTER DELETE** trigger on Orders that records deleted order details into an OrderArchive table.
